

K-12 SECURITY

Havel

An EMCOR Company

Promoting School Safety with Advanced Technology

Havel offers a number of security and life safety systems tailored to the unique needs of K-12 schools. Our primary focus is to help create a safer learning environment for students, teachers, staff, and visitors.

We understand that no two schools are alike, which is why we work diligently to fully understand and work within your school's safety plan. Then, our team can design systems that fit your safety and budget needs.

Meeting the Needs of K-12 Environments

Our security solutions are specifically designed with schools in mind. Access control allows you to vet individuals before entering the building, notifies you if doors are forced or propped open, and can be outfitted with ADA openers.

Camera and monitoring systems equip your staff with the tools they need to prevent vandalism and destruction of property or to intervene in bullying before it escalates.

Cutting-edge Monitoring Equipment

We utilize sophisticated monitoring equipment and software, offering 24/7 response and the latest features. Our security cameras can be connected with license plate readers integrated with a database of suspended students and staff, parent custody information, and the local sex offender list.

Similarly, parking lot monitoring offers brandished weapon detection and bus lane search for lost children. Interior space monitoring systems can track persons quickly with analytics.
