

SECURITY SYSTEMS

Havel

An EMCOR Company

Advanced Technology to Keep Your Facilities Safe and Secure

Planning and installing security solutions for commercial properties can be a time-consuming and complex process, so it's important to work with a professional security system designer and installer.

Havel's security solutions experts can provide advice, services, and support at each stage of the process. Our goal is to provide you with a cutting-edge system that is ideally suited for your business while offering flexibility for future growth.

Customized Systems, Comprehensive Solutions

At Havel, we believe there is no one-size-fits-all solution for business security systems. Accordingly, our customized process starts with a survey of your property and an assessment of your monitoring, control, and alarm needs. With assessment in hand, we'll work with you to identify the ideal equipment for your system, selecting cutting-edge components that are reliable, scalable, and interoperable.

Next, our team of professional installers will set up your system to help maximize situational awareness, following best practices and all relevant regulations.

Lastly, we'll test the entire security system and train your team in operations and maintenance.

Complete System Integration

Our security design engineers and installers also work to ensure that all components we install are compatible and will integrate with other security or building management systems—helping maintain the value of your current equipment. They have the knowledge and training needed to integrate virtually all of your building systems so that your security and facilities teams have a comprehensive view of activity within your building.

OUR SECURITY SYSTEM SERVICES:

Design and installation

Access control

Exterior door controls

Intrusion detection and perimeter security

Alarm systems

Cameras and video monitoring systems
