

**INDOOR AIR QUALITY
SOLUTIONS FOR SCHOOLS**

For Healthier, More Productive, & More Efficient Schools

Havel
An EMCOR Company

A building's indoor air quality (IAQ) significantly impacts the productivity, health, and comfort of its occupants, and dusty, dirty air ducts are a major source of indoor air pollutants. Havel offers a full-suite of services aimed at improving the health and productivity of school buildings, ranging from routine maintenance and duct cleaning to the latest in ultra-violet (UV-C) technology and patented ionization products.

Promoting a Healthy Learning Environment

In order to help guarantee the comfort and health of students, it is crucial that school buildings and education institutions keep their circulated air as clean and hygienic as possible. Indoor air often contains mildew, mold, bacteria, viruses, and other microbial agents that negatively impact the health and comfort of building occupants. Indoor air pollutants can cause serious health problems for students, educators, and staff members who have respiratory conditions or environmental allergies.

Improving Efficiency and Lowering Costs

Poor IAQ doesn't only affect occupants however. Airborne pathogens can also build up in HVAC systems and are frequently responsible for mechanical issues, including significant decreases in cooling capacity and reductions in efficiency. Our IAQ services offer a range of potential energy efficiency and HVAC system benefits, including extended equipment operating lifespans, boosts to capture efficiency and reductions to air intake, and significant increases in cooling capacity. In fact, we have seen clients record energy cost reduction upwards of 30 percent, which can be a game changer for school districts facing strict budget parameters.

WHAT CAN WE DO FOR YOU?

Corporate Headquarters:
Fort Wayne, IN T: 260.487.7900
Detroit: T: 248.554.1053
havelemcor.com

Indianapolis: T: 317.872.4242
South Bend: T: 574.232.6900
Phoenix: T: 480.248.2450

OUR IAQ SOLUTIONS

Preventive HVAC maintenance and repair

Air filter replacement and upgrades

Duct cleaning

Code compliance and updates

UV-C technology

- Surface decontamination
- Airborne inactivation

Air purifying ionization technology

OUR ADVANTAGES

Qualified, licensed technicians

Commercial-grade products and equipment

Flexible scheduling

Single-source for IAQ solutions and mechanical maintenance

Nationwide support and vendor network

Years of experience working in the education market
